

Engineered Designs, Inc. President Named ASHRAE Fellow

January 17, 2019

EDi is excited to announce that Ginger Scoggins, PE, LEED AP, CEM, CxA, Principal and Mechanical Engineer, has been elevated to the grade of Fellow in the American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE).

According to ASHRAE, this honor recognizes members who have attained distinction in areas relating to the sciences of heating, refrigeration, air-conditioning, ventilation, or the allied arts and sciences. To earn the award, the individual must have made substantial contributions to the industry through invention, research, teaching, design, original work, or as an engineering executive on projects of unusual or important scope. Ms. Scoggins' work with the design of floor-mounted air-distribution cabinets for high-intensity data center environments contributed to her success in obtaining the level of Fellow in the ASHRAE organization.

Ms. Scoggins, whose professional career spans 32 years, co-founded Engineered Designs, Inc. (EDi) twenty years ago. EDi is a team of professionals providing building systems design, energy analysis, and commissioning throughout North Carolina. She has been a dedicated member of ASHRAE since 1988 and involved at the Society level since 1998 where she has completed a 2-year term as a Society Vice-President, and is currently the

chair of the ASHRAE Building Ad-hoc Committee that is responsible for the sale of the existing ASHRAE Headquarters building and the renovation of the future ASHRAE Headquarters building into a net-zero operational facility.
